About the speaker

Carolyn Humphries is a qualified physiotherapist registered with the HPCSA and is the founder of Carolyn Humphries and Associates. Her physiotherapy practice specializes in the care of babies and children using a neurodevelopmental therapy (NDT) approach to treatment. All three physiotherapists currently working at her practice are thus NDT trained. They also offer screenings and assessments as part of their services. Although the practice is currently situated in the Northcliff/Fairland area of Johannesburg, their services can also be rendered to schools or homes at no additional costs.
